

VEDANG TRIVEDI

M.Tech ICT (Software Systems)

✉ trivedivedang.02@gmail.com  [Linkedin](#)  [Github](#)

Education

Year	Degree/Certificate	Institute/School, City	CPI/%
2024–Present	M.Tech ICT (Software Systems)	Dhirubhai Ambani University, Gandhinagar	7.06/10
2020–2024	B.E. in Computer Engineering	Gujarat Technological University, Ahmedabad	7.77/10
2020	Class XII (CBSE)	Maharaja Agrasen Vidyalaya, Ahmedabad	78%
2018	Class X (CBSE)	Hillwoods School, Gandhinagar	84.17%

Experience

Kraft Heinz

KHMS Intern

Feb 2026 – Present

Ahmedabad, Gujarat

- Worked as a techno-managenment intern and automated tasks such as health checks for different towers and pillars in the company.
- Designed and developed interactive dashboards using Power BI and automated manual tasks such as excel data cleaning and visualisation.
- Communicated and collaborated with tower leads and other stakeholders for drafting SOPs and operational excellence framework respectively for each tower.

Karma Technolabs

Web Developement Intern

Jan 2024 – April 2024

Ahmedabad, Gujarat

- Worked on a live project of building a CRM platform.
- Enhanced some of its user functionalities like search, filter, upload etc. eventually learning about the development and deployment phase of a live product.

JS Placements and Fiscal Services

Coordinator

Feb 2022 – Feb 2023

Ahmedabad, Gujarat

- Conducted thorough research and meticulously compiled necessary documentation, meeting all research and documentation requirements.
- Fostered effective communication between team members and created a standard pipeline.
- Coordinated with clients and candidates for making the process seamless and convenient.

Projects

Raft Census | Distributed Systems

- Project DBFS is a scalable, decentralized, robust, heterogeneous file storage solution which ensures that multiple servers can inter-operate to form a dynamic 'overlay' fabric.
- Each data file is partitioned into several parts called chunks. Each chunk is stored on different remote machines, facilitating the parallel execution of applications.
- The system allows many clients to access data and perform operations (create, delete, modify, read, write) on that data.

CardEst | Distributed Databases

- This project estimates cardinality inputs in a query optimizer using trained model on tpc-h dataset and workloads thus to provide with a better execution plan for query predicates.
- Uses Meta-ensemble model(XgBoost model used mostly) and a hybrid approach.
- Improved Pearson correlation, reduced median error and plan changes driven by learned models resulted in 70% of cases showing reduced latency and resource usage.

UML2PlantUML | LLMs,ML,Software Engineering

- This project is small scale implementation of pipeline as discussed in this [Research Paper](#).
- Fine tuned and compare results of various models like vit-bart, blip, flanT5, vit-gpt2, pix2struct, CLIP, MiniCPM.
- Preprocessed data and trained model on dataset consisting of activity and sequence diagram images to generate PlantUML code from inputted class diagram image.

Stock Market Price Prediction | ML,Stock market

- The Advanced Stock Price Forecasting Using a Hybrid Model of Numerical and Textual Analysis project involves a comprehensive approach to predicting stock prices using both numerical data and textual analysis.
- Project components include data collection,storage and visualization, textual analysis using NLTK and spaCy and some machine learning models.

Technical Skills

Programming languages & libraries: C, C++, Python, SQL, JavaScript

Tools and Technologies: Github, Git, Figma, Langchain, Raft

Databases: PostgreSQL, MongoDB, MySQL, Redis

Soft Skills: Problem solving, Communication, Leadership, Team Collaboration

Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering

Position Of Responsibility

Teaching Assistant

August 2024 - Present

Software Engineering, Object Oriented Programming

- Fulfilled duty as a TA which included taking labs, designing and evaluating assignments and exams, clearing doubts and mentoring students.

Cadet

2021 - 2022

NO.2 GUJARAT AIR SQUADRON NCC UNIT

- Held and lead various campaigns as a cadet of NO.2 GUJARAT AIR SQUADRON NCC UNIT.

Achievements

- Qualified national level exams like GATE CS 2024, NTSE 2018.
- Won Bronze medal for securing a zonal rank in SOF Maths Olympiad 2018
- Won inter-college chess tournament.
